

Carbon Reduction Plan

Supplier name (Entity): Health Services Laboratories LLP

Company number: OC389166

Publication date: April 2023

Commitment to achieving Net Zero

The Health Services Laboratories LLP is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured. We have used the operational control approach to our organisational boundary.

Our emissions have been measured using BEIS published emissions factors and we have followed the GHG Protocol Corporate Accounting and Reporting Standard.

Baseline Year: 2022

Reporting Period: 1st July 2021 to 30th June 2022

Additional Details relating to the Baseline Emissions calculations

As this is our first year of recording our Scope 3 emissions (apart from limited reporting under SECR), our baseline emissions being reported are also our current emissions being reported.

Emissions	TOTAL (tCO2e)				
Scope 1	290.87 tCO2e				
Scope 2	1160. tCO2e				
Scope 3	502.37 tCO2e				
	Our Scope 3 emissions breakdown is as follows:				
	Cat	Subject	Inc/Exc	Included emissions or reason for exclusion	tCO2e
	1	Purchased goods and services	Inc	Limited data available	1.83
	2	Capital goods	Exc	None in the reporting year	0.00
	3	Fuel and energy related activities (not included in scope 1 or scope 2)	Inc	Electricity transportation & distribution	106.12
	4	Upstream transportation and distribution	Inc	All transportation and distribution using courier and shipment contractors, paid for by the entity	16.69
	5	Waste generated in operations	Inc	Multiple waste streams	19.71
	6	Business travel	Inc	De-minimis (due to the operational split between HSL and The Doctors Laboratory Ltd).	0.00
	7	Employee commuting	Inc	All employee commuting	294.60
	7	Employee home working	Inc	Employee space heating and lighting of home working and workstation	63.42
	8	Upstream leased assets	Exc	N/A	0.00
	9	Down stream transportation and distribution	Exc	De-minimis	0.00
	10	Processing of sold products	Exc	Outside of boundary as not within control of reporting entity	0.00
	11	Use of sold products	Exc	Outside of boundary as not within control of reporting entity	0.00
	12	End-of-life treatment of sold products	Exc	Outside of boundary as not within control of reporting entity	0.00
	13	Downstream leased assets	N/A	De-minimis	0.00
	14	Franchises	N/A	Not applicable	0.00
	15	Investments	N/A	Not applicable	0.00
Total Emissions	1953.24 tCO2e				

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets:

- Transition towards certified renewable energy sources, commencing 2023
- Include sustainability criteria in all new procurement contracts by 30 June 2023
- Engage with key suppliers (80% of spend) to address waste reduction
- Identify and initiate opportunities to reduce scope 3 emissions
- Complete conversion of global fleet to zero-emissions vehicles by 2040

We project that carbon emissions will decrease over the next five years to 731 tCO₂e by 2028. This is a reduction of 62.5%.

This reduction is mainly driven by the transition to renewable electricity the effects of which will be fully seen in the 2025 reporting year. It should be noted that current electricity emissions are allocated to us and The Doctors Laboratory Ltd based on occupancy floor area and allocation varies from year to year.

Carbon Reduction Projects

In the future we hope to implement further measures such as:

- Continued efficiency improvements in the operation of our buildings
- Targeting carbon reduction measures based on the findings from the detailed measurement of our full operational carbon inventory

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

.....
